

การใช้งานระบบ Easy Chair สำหรับงานประชุมวิชาการ สำหรับ Reviewer

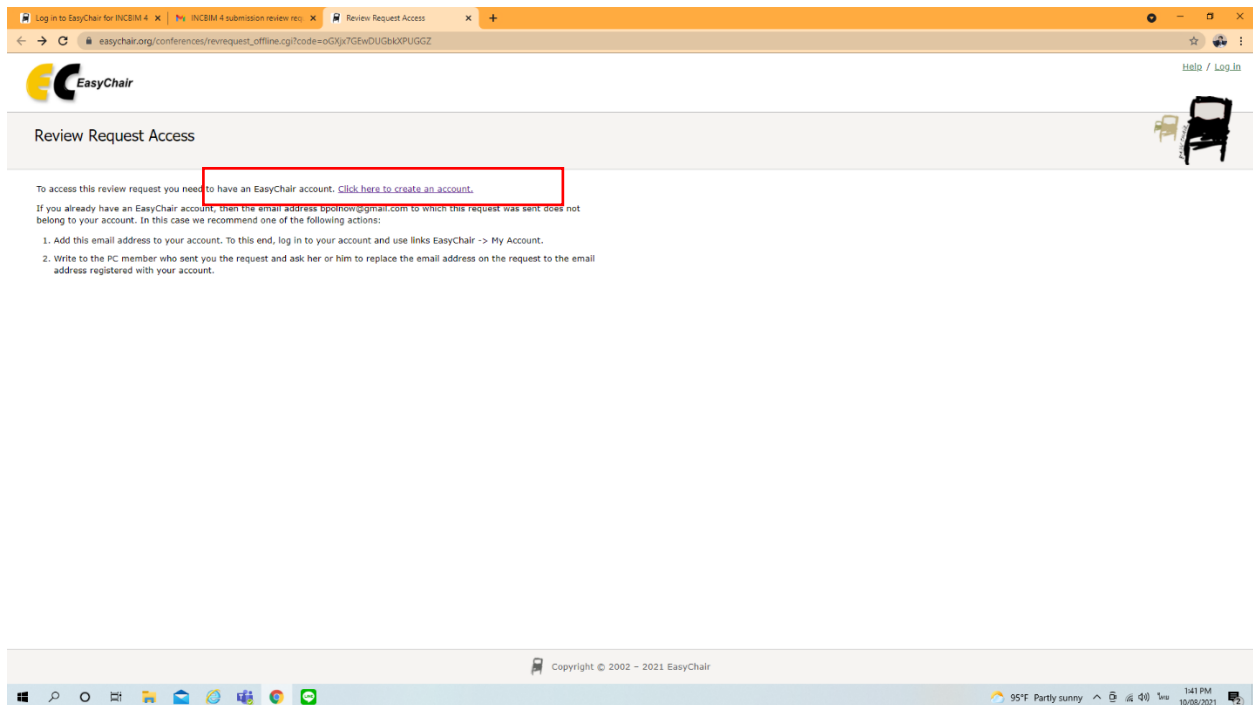

สำหรับ reviewer การใช้งานจะเหมือนกันกับ author โดยการเข้าระบบใช้ account เดียวกัน จะทราบได้
อย่างไรว่าตัวเราเป็น reviewerคือจากการได้รับเมลจาก PC member (program chair member) ของงาน
conference นั้น ดังรูปและเข้าระบบในฐานะ reviewer เพื่อโหลดและประเมินบทความในระบบ

หมายเหตุ ระบบ easy chair จะทราบโดยอัตโนมัติว่า ใครเป็นสมาชิก easy chair แล้วยัง ดังนั้น reviewer ที่ยัง
ไม่ได้เป็นสมาชิก ระบบจะส่ง link เพื่อให้เข้าไปสมัครสมาชิกก่อน ส่วน reviewer ที่เป็นสมาชิกแล้วจะได้รับ
เมลตามรูปด้านบนนี้

reviewer ที่ไม่ได้เป็นสมาชิกจะได้รับเมลตามรูปด้านบนนี้

Title:	The Impact of Institutional Ownership on ESG performance
Paper#:	5 (Aug 09, 16:30 GMT)
Track:	INCBIM (International) 21
Author keywords:	Institutional ownership ESG performance CSR sustainability performance
EasyChair keyphrases:	Institutional ownership (270), institutional investor (230), corporate social responsibility (142), esg score (100), total asset (100), developed country (80), financial economic (70), stamford international university (63), social score (60), firm performance (60), ownership structure (60), social responsibility (60), government ownership (60), sustainability performance (50), country effect (50), total debt (50), market value (50), natural logarithm (50), cross sectional sample (47), firm esg performance (47), corporate finance (40), environmental score (40), esg performance (40), individual element (40), governance score (40), market performance (40), business ethic (40), developing country (40)
Abstract:	This research addresses the issue of whether institutional investors affect the environmental, social and governance performance of firms around the world, collectively called sustainability performance. We dwell on extant literatures [Dyck et al., 2018] with a more recent cross-sectional worldwide sample with alternative sources of Environmental, Social and Governance (ESG) data. The sample consists of 5871 firm observations from 79 countries. We find that across the sample Institutional Ownership is positively associated with sustainability performance, however the development status of country of jurisdiction reverses the relationship.
